Average MRR	61.40	98.78	20.82
Average Tenure	40.49	52.10	29.60
Month-to-month			
Churn Rate %	32.2%	54.6%	18.9%
Average MRR	50.22	87.02	20.41
Average Tenure	15.73	21.55	9.13

Revenue at risk by Contract

If we take no action, we risk losing \$417,393 in unrealized revenue over the next 90 days. The financial bleeding is highly concentrated: Month-to-month contracts alone account for 86.9% of this total loss.

RECOMMENDED ACTION

Stop incentivizing month-to-month signups. Shift marketing spend to acquire 1-year contracts, even at a higher CAC, to stabilize the Year 1 retention cliff.

Execute an immediate retention intervention targeting Month-to-Month Fiber Optic users, as this specific cross-section carries our highest localized churn rate (54.6%).
